Further, Together

DEAR COLLEAGUES,

On behalf of the American Urogynecologic Society (AUGS) and the International Urogynecological Association (IUGA), we are pleased to welcome you to the 2019 Scientific Meeting in Nashville, Tennessee, USA!

For the second joint meeting of our societies, the Program Committee focused on the theme, “advancing physician and patient wellbeing & wellness”. Throughout the meeting, presentations will focus on the paramount importance of physician wellbeing in their selfless pursuit of patient wellness.

There is truly something for everyone at this meeting. With a selection of 29 half-day workshops, cutting edge research presentations, panels on the latest hot topics in FPMRS, and focused programming for fellows, basic scientists and advanced practice providers, each meeting participant will have the chance to create their own experience.

In addition to the exceptional science, what makes the AUGS/IUGA meeting special is the opportunity for attendees to connect with colleagues and experts from around the globe. We encourage you to participate in the networking events throughout the week, including the Welcome Reception in the Exhibit Hall and the Friday Night Party. Join us for a 5K Run/1 Mile Walk around Nashville to support the FIUGA and PFD Research Foundation.

We hope you take some time to explore Nashville with your colleagues and new connections. Unwind and relax amidst the expansive culinary scene and enjoy the live music found around every corner.

Welcome!

Features of our online community:

- Discussion Forums
- Ask the Physician Experts
- Downloadable Resources
- Informational Articles

Our online community, Voices for PFD, is an outlet for women to share their stories, get support from other women, and ask experts about disorders impacting the pelvic floor, such as incontinence and prolapse.

Pelvic Floor Dialogues

Patients can subscribe to our eNewsletter to keep up-to-date on the latest advancements on pelvic floor disorders.

Patient Fact Sheets

Patients can utilize fact sheets to better understand diagnoses and treatment options on a variety of topics.

Now available in large print and Spanish.

Voices for PFD YouTube Channel

Women with pelvic disorders can subscribe to the Voices for PFD YouTube Channel to hear from leading physicians about pelvic floor disorder symptoms and treatment options.

Patient educational resources are sponsored by AUGS and supported in part through educational grants from:

EDUCATIONAL GOALS AND OBJECTIVES

- Describe the importance of physician well-being in providing quality care.
- Name strategies to avoid physician burnout.
- Describe and discuss the pathophysiology of pelvic floor disorders, including pelvic organ prolapse, urinary incontinence, fecal incontinence, and sexual dysfunction.
- Identify risk factors, epidemiology, and impact on quality of life of pelvic floor disorders, including pelvic organ prolapse, urinary incontinence, fecal incontinence, and sexual dysfunction.
- Describe indications and methods for uterine preservations during prolapse surgery.
- Manage pelvic organ prolapse using a variety of non-surgical and surgical techniques including pelvic floor muscle training, pessaries and surgery.
- Manage urinary incontinence using a variety of non-surgical and surgical techniques including topical hormones, medical therapy, pelvic floor muscle training, office procedures and surgery.
- Manage bowel incontinence using a variety of non-surgical and surgical techniques including medical therapy, pelvic floor muscle training, office procedures and surgery.
- Describe pelvic floor anatomy and how to avoid, minimize and manage complications of pelvic surgery.
- Define the available technology to assess pelvic floor function/ dysfunction and its role in clinical care and research.
- Recognize the importance and the process of establishing a multi-disciplinary approach in the management of Mesh complications from pelvic floor surgery.
- Recognize the importance of and the process of establishing a multi-disciplinary approach in the evaluation and management of transgender patients.
- Define the novel basic science approaches to the study and treatment of pelvic floor disorders.

EDUCATION CREDITS

Creighton University Health Sciences Continuing Education designates this live activity for a maximum of 34.0 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

AAPA accepts AMA category 1 credit for the PRA from organizations accredited by ACCME.

NURSE CE

Creighton University Health Sciences Continuing Education designates this activity for 34.0 contact hours for nurses. Nurses should claim only the credit commensurate with the extent of their participation in the activity.

ACCREDITATION STATEMENT

In support of improving patient care, this activity has been planned and implemented by

Creighton University Health Sciences Continuing Education (HSCE) and the American Urogynecologic Society and the International Urogynecological Association. Creighton University Health Sciences Continuing Education is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

PHYSICAL THERAPY

The Board of Physical Therapy Practice does not pre-approve continuing education course offerings but will accept a continuing education activity when they are planned and conducted for physical therapists and the continuing education activity relates to the practice of Physical Therapy. Each professional is responsible for their own certification. (The following States require pre-approval for physical therapy credit: California, Florida, Louisiana, Nevada, Ohio and Texas.)

SPECIAL INTEREST GROUP MEETINGS

AUGS and IUGA SIGs provide a sense of community and focused education around specific areas of interest in the field of FPMRS. All attendees are welcome to join the SIG meetings to learn more and become involved with AUGS and IUGA.

All SIG meetings are non-CME programming.

INDUSTRY SUPPORTED EDUCATION

WEDNESDAY, SEPTEMBER 25

12:15 PM - 1:15 PM

Lunch Symposium: Current State of the Use of Energy Based Therapies (EBT) and Urogynecology 207

CME will be available for this program.

FACULTY: Patrick Campbell, MD (United Kingdom); Cheryl B. Iglesia, MD (United States)

Attendees will gain an understanding of the different energy technologies and delivery systems designed for vaginal use including radiofrequency, CO2, Er:YAG and Nd:YAG lasers, and HIFEM. This session will review the clinical applications of the various energy-based therapies including clinical experience and data in the areas of vaginal laxity, sexual function, incontinence, and lichen sclerosus. Attendees will learn the relative merits of each device and learn the state of the medical science justifying their use or non-use. Lastly, recent regulatory and societal evaluations related to this group of procedures will be discussed.

Learning Objectives:

- Understand thermal effects and types of thermal delivery described for vaginal uses
- Identify and describe the different energy-based devices in gynecology
- Describe the current evidence for effectiveness, risk, potential indications and other aspects of the various devices
- Summarize recent regulatory (FDA) and societal evaluations and interventions related to this group of surgical procedures

Supported by an unrestricted educational grant from Viveve.

THURSDAY, SEPTEMBER 26

6:45 AM - 7:45 AM

Breakfast Symposium: Keys to Tax Reduction, License Protection and Lawsuit Prevention 207

Medical professionals have unfortunately become all too easy targets for many trial attorneys. Learning how to use legal entities is vital to protect everything they have worked hard to achieve. Setting up C-Corps, and LLCs is only part of the answer to this rapidly growing issue. This course will also instruct attendees on how to protect one of their most important assets, their medical license. Even if they aren't sued for a larger amount than what their malpractice insurance covers, all medical professionals will encounter being investigated and possibly sanctioned for issues unrelated to the reported lawsuit. Utilizing three legal tools, in many cases, can decrease malpractice insurance costs and drastically reduce their income taxes - all while keeping their name and license from being reported to the NPDB.

Supported by Legally Mine.

12:30 PM - 1:30 PM

Lunch Symposium: Sacral Neuromodulation, Recharged 104

FACULTY: Kevin Benson, MD (United States); Rebecca McCrery, MD (United States); Andrea Pezzella, MD (United States)

Please join us to learn about the Axonics System. Hear from Drs. Benson, McCrery and Pezzella on their first-hand experiences with Axonics. This session will provide you with the latest information on the most innovative and advanced technology in Sacral Neuromodulation therapy.

Supported by Axonics Modulation Technologies.

Lunch Symposium: Today's POP Treatment Options: Providing Clarity on the Transvaginal Mesh Market Withdrawal and Alternative Treatment Options for Patients

207

FACULTY: Ronald Morton, Jr., MD (United States); Miles Murphy, MD, MSPH, FACOG (United States); Michel Cosson, MD, PhD (France), Thomas Giudice, MD, MS (United States)

This session will:

- Provide clarity on the FDA's decision and the status of mesh globally
- Learn from our panel of experts about alternative procedures, data, patient selection, surgical tips and techniques
- Host an open discussion Q&A

Supported by Boston Scientific.

Product Theater: Introducing FemiLift

Hall B

SPEAKER: Menachem Alcalay, MD (Israel)

Learn how a new approach in clinical studies is moving forward with objective and accurate methods for a better evaluation of the effectiveness in treating GSM and SUI patients.

Supported by Alma Lasers.

FRIDAY, SEPTEMBER 27

6:45 AM - 7:45 AM

Breakfast Symposium: Altis® - Safe and Efficacious for Patients. Predictable and Repeatable for Physicians

207

FACULTY: Ty Erickson, MD (United States); Jan Paul Roovers, MD (Netherlands); Janet Harris-Hicks, MD (United States)

Please join us for an interactive breakfast discussion where our conversation will include the clinical, technical and patient outcomes with Altis®, the only sling with a premarket Investigational Device Exemption (IDE) study.

Supported by Coloplast.

Breakfast Symposium: Nocturia: Are We Doing Enough?

104

FACULTY: G. Willy Davila, MD (United States); S. Abbas Shobeiri, MD, MBA (United States)

This breakfast symposium is intended to improve the understanding behind differences in pathophysiology of Lower Urinary Tract Symptoms vs Nocturia with current treatment algorithm, paradigm, and agents specific to appropriate disease state.

Supported by Ferring Pharmaceuticals.

12:30 PM - 1:30 PM

Lunch Symposium: HIFEM Therapy: A Non-Invasive Treatment Option for Pelvic Floor Dysfunction

207

FACULTY: Neeraj Kohli, MD (United States); Nathan Guerette, MD (United States); Irwin Goldstein, MD (United States); Stephanie Molden, MD (United States)

This luncheon symposium will review the science, data, and application of HIFEM (High Intensity Focused Electro-Magnetic) Technology for the treatment of pelvic floor dysfunction including OAB, UI, and other dysfunctions. Previous data, recent study results, clinical pearls as well as case presentations will be presented from leading experts. HIFEM can provide effective office-based treatment to select patients with pelvic floor dysfunction and is a valuable addition to the treatment armamentarium of the urogynecologist.

Supported by BTL Medical.

Lunch Symposium: Bulkamid - A New Treatment Paradigm for SUI

104

FACULTY: Mickey Karram, MD (United States); Roger R. Dmochowski, MD, MMHC (United States); Eric R. Sokol, MD (United States); Tomi Mikkola, MD (Finland); Philip Toozs-Hobson, MD (United Kingdom)

This lunch symposium will provide attendees with an introduction to the Bulkamid Urethral Bulking System including presentation of up to seven years of follow-up data. The symposium will also include the presentation of the RCT Bulkamid vs. TVT at 12 months and Bulkamid vs. Collagan RCT results. Attendees will gain an understanding of the unique material and system of Bulkamid, its wealth of data, positioning in the treatment paradigm and the safety profile of the procedure.

Keynote Lecture: Reducing Distractions in Order to Improve Productivity

WEDNESDAY, SEPTEMBER 25

2:45 PM - 3:30 PM

Hall A

Paul Mohapel, BSc, MSc, MA, PhD

Associate Faculty
Royal Roads University
Canada

Are you overwhelmed with the volume of daily emails you receive? Do you find yourself trying to do ten things at once? Do you have trouble concentrating for sustained periods of time because so many things are vying for your attention? You are not alone. Recent healthcare research suggests that increasing distractions, particularly those due to digital multitasking, are contributing to greater stress and burnout, poorer focus, and reduced productiveness. This session will report on recent startling psychological and neuroscience research on the negative impacts of multitasking. The session will offer useful approaches to reduce distractions and enhance focus in order to improve well-being and productivity.

Paul Mohapel wears many hats - he is a consultant, lecturer, educator, researcher, and a facilitator. He uses his extensive knowledge of the brain, psychology and leadership to design and facilitate workshops in organizational development, and to lecture at several universities in leadership, business, and psychology.

IUGA Ulf Ulmsten Lecture: Curing Pelvic Floor Disorders in 2040: Measuring Sex and Other Aspects of Pelvic Floor Function

THURSDAY, SEPTEMBER 26

10:10 AM - 10:40 AM

Hall A

Rebecca G. Rogers, MD

Director of the Women's Health Institute
Associate Chair for Clinical Integration and Operations
University of Texas at Austin,
Dell Medical School
United States

Cure of pelvic floor dysfunction is elusive. Our ability to improve women's lives is hampered by treatments that are evolving, poorly defined therapeutic goals, and poor communication and understanding of patients (and providers) of what cure looks like.

This lecture will discuss the definition of "cure" of pelvic floor dysfunction, describe pelvic floor and health outcomes that matter to patients and describe what care in 2040 when we redefine our care focus to meet outcomes important to patients.

Dr. Rogers received her medical degree from Harvard University and pursued residency in Obstetrics and Gynecology and fellowship in Female Pelvic Medicine and Reconstructive Surgery at the University of New Mexico. There, she established the Division of Urogynecology. In 2017, she moved to Austin, Texas and is the Director of the Women's Health Institute and Associate Chair for Clinical Integration and Operations at Dell Medical School. At Dell, her focus is on bringing value-based care to women with complex gynecologic conditions and measuring outcomes important to patients.

IUGA established the Ulf Ulmsten Lecture in 2004 with the purpose of promoting innovation in Urogynecologic surgery and encouraging innovative thought processes among our IUGA members.

AUGS Raymond A. Lee Lecture: The Future of Innovation in Female Pelvic Medicine and Reconstructive Surgery

FRIDAY, SEPTEMBER 27

10:15 AM - 10:45 AM

Hall A

Peter L. Rosenblatt, MD

Assistant Professor, Harvard Medical School
Director of Urogynecology,
Mount Auburn Hospital
United States

Over the last 20 years, there has been a great deal of innovation in the field of FPMRS, not only involving surgical implants, but also new methods of treating a range of common conditions, including stress incontinence and overactive bladder. There are many forces that drive innovation, including the desire to improve patient outcomes and address unmet clinical needs. Both physicians and industry play an important role in the development of new devices and techniques to treat pelvic floor disorders, but the future of innovation is being challenged by a number of external forces, including FDA decisions and mass tort litigation. As surgeons, we find ourselves at a crossroads, and which way we go depends not only on these external factors, but on our own actions. In this lecture, we will explore the history of innovation in FPMRS, and how we can have an impact on the future of our field.

Since 1995, Dr. Rosenblatt has been the Director of Urogynecology and Reconstructive Pelvic Surgery at Mount Auburn Hospital in Cambridge. He served as the Urogynecology Fellowship Director at Mount Auburn Hospital from 1999 - 2010. Dr. Rosenblatt is an Assistant Professor of Ob/Gyn at Harvard Medical School. He is board certified in Ob/Gyn and Female Pelvic Medicine and Reconstructive Surgery. He has an active clinical practice and specializes in laparoscopic reconstructive pelvic surgery and minimally invasive treatments for pelvic organ prolapse as well as urinary and fecal incontinence.

The Raymond A. Lee Endowment is a named lectureship created by AUGS to honor one person annually who contributed to the development and surgical advancement of urogynecology and to further advance the knowledge and teaching of gynecologic surgery through ongoing AUGS educational programs.

FELLOWS' DAY

Fellows' Hands-On Lab

TUESDAY, SEPTEMBER 24

7:30 AM - 5:00 PM

209

This course was designed by a team from AUGS and IUGA to provide fellows an opportunity to review pelvic anatomy, learn new surgical techniques and enhance their surgical skills. Fellows will rotate through various stations, working in small group settings with field experts to practice surgical procedures and learn about diagnostic approaches and non-surgical alternatives.

Registration for the hands-on lab portion of Fellows' Day has sold out. Please see the Attendee Services Desk with any questions.

The Fellows' Hands-On Lab is supported by Coloplast and WL Gore.
